

## Change The Look Of Your Myspace Profile

A simple change of background can change the look of your MySpace profile. And you have a humongous collection of MySpace backgrounds in doobix (dot) com. Just visit the website and you will be spoilt for choice by the numbers of categories available here. The categories are based on colors, patterns and themes etc. There is a variety of shades to choose from for your MySpace backgrounds. Moreover, there is plethora of colors like dark blue, dark green, light grey, yellow, orange, pink, and purple. Under each color, there are several patterns to choose from e.g. under orange there is 139 different MySpace backgrounds! What's more, if you want patterns, doobix (dot) com offers brick, cloth, stars, strips, space, sky, wood and so many more. Want the background to reflect your mood? Try army/USA, if you are feeling patriotic or hearts, if love is in the air. Holiday is another good category of MySpace backgrounds to reflect the joy and festivity that's going on. People can also use their MySpace backgrounds to highlight their hobby. For example, budding musicians can choose backgrounds from the music category of doobix (dot) com. The backgrounds from this category show pictures of musical notes and instruments. Similarly, there are writing category and computer to choose from. Pet-lovers and sports-lovers can choose from the MySpace backgrounds category of people/animal and sport respectively. Are you a brand-conscious shopper? Then let your MySpace profile reflect that. Choose the brand names category from doobix (dot) com to find your MySpace background. In total, there are more than 5,000 different backgrounds to choose from. It is not that you can only take MySpace backgrounds from doobix (dot) com, there are also MySpace Layouts and MySpace codes from this site. The MySpace codes are especially very helpful. There are several sections in this part such as 'hide stuff in your MySpace', 'MySpace profile codes', 'MySpace image codes', 'MySpace text codes' and 'miscellaneous codes'. As the name suggests, each MySpace codes target a particular area of your profile page. With the hide stuff section, you can hide parts of your profile like comments or friend list etc. The MySpace codes on profile also let's you add cool things like scrolling your friend list/comments and the text-codes make the text in each section of your profile move the way you like! Don't think that you will have to be a HTML/or CSS genius to implement them. Doobix (dot) com has detail instructions of how put these MySpace backgrounds and MySpace codes. If you like to do it manually, then click on the MySpace backgrounds of your choice and copy the code that comes with it. Now log into your MySpace account and click on the profile edit button. Next, paste the copied code under 'about me' section. The background will change to the one of your choice. The selection of MySpace codes is even easier. It has detailed step-by-step instruction, which you have to follow to tweak your profile page. MySpace codes has to be entered manually, it cannot be updated automatically like MySpace backgrounds. For making automatic updates of your MySpace backgrounds, enter the relevant information (which will never be shared) and your new, totally radical MySpace profile page will be ready.
