Once this basic point is clear in your mind we can check our list: 1 - Plan your trip with at least 6 months advance: if you want to go to Siena - Italy - to watch that famous horse race called "The Palio" which happens in mid August you must book your ticket in February so you can be sure to gain some good savings with your dirt cheap airline tickets. 2 - There is another way to gain those cheap tickets: last minute trip. In this way easily you won't be able to choose any destination you like, you will be forced to get the one that is available at the moment; for example if someone did not show up at the check in so the plane is not full: the company will likely sell those tickets for a low fare instead of flying with vacant seats. 3 - Surf the web and check special offers and discounts either with low cost companies or big names and be ready to change your favourite destination accordingly to what you find, it will be good if you find a good price for a destination not too far from your primary goal, you can always reach that spot once you get near.
