

## California Fireplace Shops

California fireplace shops carry inserts that improve the efficiency of the fireplaces. These are available in wood and gas. They are prefabricated firebox. These are sealed units. California fireplaces offers different sizes and surrounds that go with these units. Improving an older masonry fireplace on the inside by installing a metal firebox might also be an inspiration to update the face and mantel, Many of the mantels carried by Wilshire fireplace can be custom made to any sizes. If you have plans for building an innovative custom design, our consultants would be very happy to help you. All 7 stores of California fireplace have experienced help to design your fireplace mantels and accessories.

Wood is traditional fuel for a fireplace, and [new fireplace manufactures](#) units offered today make the most of the [prefabricated fireplaces](#). However, wood may not be allowed to burn in some places. California fireplace shops carry an extensive line of gas logs that are ceramic and radiate heat in the room. They come in various style and sizes and they all come with glowing embers that make them look real.

Additional heat can be had with a cast iron fire back. California Fireplace shops carry an assortment of firebacks in iron and stainless steel. Fireback sits behind the burning logs and absorbs heat from the fire and then radiates it in the room. Also it protects stone brick and mortar from soot. An alternative to fire back is a 3 panel reflector that has the same function as a fireback. Please visit any of the California fireplace shop locations and experienced salespersons would be happy to help you.
