7 Winning Tactics to make money with no web site; How marketing uses e-mail making BIG money!

The small business e-mail marketing strategy is one of the most extremely powerful marketing strategy on the internet now. Great small business e-mail marketing strategy can drive your small home based internet marketing business successful faster and easier. Today, I am going to share you my 7 ways to make money with no web site - make money with your mailing list or opt-in list. An opt-in list can be quite crucial to any site or internet based company. Even for a small venture such as a niche profit site an opt-in list can make a world of difference and also add some extra income for your pocket. Rarely would you see an e-commerce site, big or small, that is without an opt-in list. An opt-in list allows for a company to market their wares and site via an e-mail. With an opt-in list, a site and a subscriber consent to sending and receiving a newsletter from your company. Through this, you can keep your subscribers abreast of what is currently available in your site as well as whatever is coming out. And because there is mutual consent between the two parties, any mail sent to the list is not considered as spam mail. There is a great number of successfully read promotional materials such as catalogs, newsletters and such that are sent because the subscribers themselves have signed up for them, meaning, they do want to be sent those items. Building a list is crucial, only a small percentage actually subscribes for an opt-in list. Many people find promotional mails annoying but if you provide a good newsletter or promotional material, you will see your list build up and grow. You can also achieve this by having good content on your site. If people like what they see and read on your site, then they surely would want more. Newsletters would be a way to attract them back to your site. You can use a little teaser or appetizer if you will. But other than marketing your wares and your services, an opt-in list can also be used to earn extra profit. Not all lists can be used though. It would be good to first build a successful list with a huge number of subscribers. The more subscribers you have, the more money you can get. I strongly also believe that the more opt-in list you have, the more success of your home based internet marketing business you get! Here are seven ways to make money with no web site. You'll discover 7 alternative ways to make money with your opt-in list. 1) Place advertisements. There are many corporations who will be willing to pay to put their banners and ads on a list with many subscribers. Selling or renting out lists is not a good idea so rather than doing that, many companies would just rather place ads with lists that have a huge subscriber base. Your newsletter could be placed with many ads and each one spells money. 2) Have affiliations with other companies that have at least a semblance or relation to what your site is about. Here other companies will provide links and brief descriptions of what they offer products and services. With every click made on the link that directs or leads a subscriber from your list to their site, the company will pay you. This is P4P or pay for performance. 3) Make deals with other companies by asking for a small percentage of sales done through your list. With every sale done by customers that have come from your list and have gone there because of your newsletter, the other company will pay you a small percentage of your sales. The more people who buy from them, the more earnings you get. 4) You may also get products from other sites on a consignment basis and sell them to your list via your newsletter. Place descriptions, articles and photos of the product in your newsletter. There will be those who will buy from you and when that happens, you can order the product from the other site and sell it to your buyer. 5) Sell e-books or a compilation of your articles on your list. Manuals and how-to articles are in great demand. Many people will be willing to shell out money to gain knowledge about a certain topic and subject. With your existing list trusting your expertise in that area, an e-book could be offered and sold or used as an incentive. 6) Create a network out of your list. Get people to invite more people to view your site and subscribe to your list. The larger your list is, the more people will be able to click on your links and affiliate links as well as make your advertisement rates higher. 7) Subscribers are willing to pay for information if they know that it can be trusted and relied upon. Use your list to get more and more people to subscribe to you as well as browse your site. Lastly, you can use your list to earn money by making them your partners. Your list will be the bloodline of your growth and increase. Conclusion, I found that there is over 75% of e-mail traffics come from United State as my investigation of how to make money with no web site - make money with small business e-mail marketing strategy. If your target markets are in United State, you MUST implement your own small business e-mail marketing strategy to skyrocket your sales. Nevertheless, you have to consider your small business e-mail marketing strategy to increase your sales dramatically as well.
