

## Global Resorts Network announces marketing system that works...

Global Resorts Network announced Monday that they have approved Wealth Funnel System as a Global Resorts certified training and marketing system that works! With so many GRN teams out there many are often confused on whom to join with when starting their own Global Resorts Network business. Many find that when they've joined GRN they fail to be properly instructed on how to REALLY market online. Says Derrick Harper, founder of WealthFunnelSystemTWO.com Global Resorts Network marketing and education system that teaches each new member how to duplicate the exact strategies of the TOP EARNERS you see within GRN. Mr. Harper, a thirteen-year veteran of Internet Marketing has been training and educating individuals looking for success with their own home businesses for over 5 years. Prior to teaching people how to market online Mr. Harper worked with large fortune 500 companies such as Pfizer, Wyeth, Merck, MTV networks, Volvo Cars, and many others in successfully growing their online brand awareness as well as developing strategic internet marketing campaigns to launches for new and (or) revised products. When asked why he created a marketing system for Global Resorts Network, "I fell in love with the GRN product because I LOVE to travel. I spend roughly over half my year traveling and wanted to save more money when I traveled. Then I discovered the one-of-a-kind compensation plan that is offered by Global Resorts Network and I was hooked. I realized that if I educated people on how to successfully market online and grow their Global Resorts business then I'd have a team of winners that assisted me in reaching my goals as much as I assisted them in reaching their goals." "I truly believe that the Global resorts Network discount travel membership is by far the best product to build your first home business around. It holds a great RETAIL value to the consumer and its compensation plan is unmatched in the industry. Not to mention that it allows one to travel more and experience more in their own lives when they use the product." Quoted Mr. Harper when asked to sum up the GRN product and its place in the home business product arena.
