USB Flash Drives: Store, Transfer & Carry Your Data

USB drive is a sheer light plug and play storage device that makes use of flash memory to store data. It is a great alternative to zip drive disk and CD. It has become the popular choice of the contemporary time. It is an additional drive that can be easily removed from the computer. Custom USB flash drives do not need any battery or external supply of power. These drives are known by different names; popular being flash drives, jump drives, pen drives, and thumb drives. Whatever be the name, the fact remains that USB flash drives are the most compact and easy to use devices for storing and transferring data. These drives do not require any special set up. All that is required is a computer equipped with a USB port.

Benefits Offered By USB Flash Drives

Easily portable
Data can be retained for a longer period of time even after the USB device is unplugged from the computer. Data remains intact even when there is a power failure and the drive has not been removed from the computer
High storage capacity ranging from 256 MB to 4 GB
Convenient to transfer data
Fast and reliable
Durable
Compatible with most of the modern operating systems including Windows, Linux, UNIX and Mac OS X

There is a vast array of USB flash drives in the market. If you visit any of the computer stores in your locality, you'll be amazed to find such a wide variety of USB drives. One of the best USB drives is the imitation flash wristband drive that is very impressive to look at. This 256 MB drive is appreciated for its water resistance property. It can encrypt nearly 10 distinct thumbprints and 200 website logins. There are a couple of 256 MB drives that allow you to run applications such as Music Match and Open Office.

Finding the Best Service Provider

There are myriad service providers in the industry but not all enjoy sound reputation in the market. It is preferable to buy the products from an authentic seller who has a name in the business world of manufacturing USB flash drives. Customjumpdrives.com is a well known supplier of USB flash drives in the US. Our Lexar USB drives come in a wide variety of colors and styles. According to your personal need and budget, you can get your USB drive customized from our experts. We provide you with the flexibility to even customize the storage space. We offer a plethora of Lexar models to cater to the varying needs of our customers. Each of our drives conforms to world class quality. Our jump drives work well with USB 1.1 as well as USB 2.0 port.
